

Product Name:	anaerobic granular sludge
Product Description:	Anaerobic granular sludge is a kind of sludge which is rich in various anaerobic microbial populations, being formed in the treatment of citric acid wastewater. As micro- ecosystem of self-balancing performance, it includes various anaerobic microbial populations that reduce all kinds of organic contaminants in original waste water and has the ability of contacting with waste water and strengthen the effect of organic contaminants degradation.
Executive Standard:	T/CBFIA 14001-2017
Main Usage:	It is mainly used for waste water treatment. Anaerobic granular sludge itself has various microbial populations and can degrade various kinds of organic contaminants in original waste water at a lower cost.

Anaerobic granular sludge quality standards

Items	Index
Appearance	Ellipse, a little flat, black inside, exterior is coated with slightly gray viscosity substance.
PH	6.0~7.6
Valid Particle Ratio/%	≥65
Small Particle Size (D) /mm.	≤5
The Rate of volatile solid and total solids /%	≥65
Sedimentation Rate/ (m/h)	50~150
Settling Ratio (SV30) /%	≥90
